SPECIAL SESSION 4

Few-shot/Zero-shot Visual Learning & Generalization

This session focuses on **Few-shot/Zero-shot Visual Learning & Generalization**, addressing high-performance visual task challenges under low-data or unseen-category scenarios. It covers key topics: rare-object classification, cross-domain recognition, meta-learning modeling, low-data feature mining, unseen-category detection, semantic segmentation, knowledge distillation, open-set learning, cross-modal transfer and long-tailed data adaptation.

We invite papers on innovative algorithms and transfer strategies. Discussions center on breaking data limitations, with submissions of novel frameworks, case studies and practical solutions welcome.
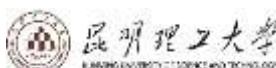

Call for Papers

Topics of interest include, but are not limited to:

- Few-shot visual classification for rare objects
- Zero-shot visual recognition across domains
- Meta-learning for few-shot visual modeling
- Low-data visual feature enhancement & mining
- Zero-shot visual object detection for unseen categories
- Few-shot semantic segmentation with cross-task transfer
- Knowledge distillation for few-shot visual generalization
- Open-set zero-shot visual learning for unknown classes
- Cross-modal transfer for few-shot visual recognition
- Few-shot visual adaptation for long-tailed distribution data

(Choose special session 4)
Or email to: icivc_conf@163.com
Notes:

Papers must be written in English, at least 4 pages in length, and follow the conference template.

Abstract-only submissions are accepted for oral presentation (no publication).
Detailed instructions: http://icivc.org/sub.html

Publication

◆IEEE

All accepted and presented papers will be included in the ICIVC 2026 Conference Proceedings, published by **IEEE**, and submitted for indexing in **Ei Compendex and Scopus**.
